# Effective Feedback to Maximise Progress

A one-day course to explore the evidence-based approaches to feedback

The EEF's Teaching and Learning Toolkit has identified effective feedback as leading to an additional 8 months of student progress. However, providing students with meaningful feedback they can act on can be a challenge.

The course will:

- Review the latest research into effective feedback approaches and consider a range of practical strategies to use in the classroom
- Explore ways to empower students to act on the feedback they receive
- Consider the relationship between feedback practices and workload
