

MAKING MANIPULATIVES MEANINGFUL

Join us for a dynamic one-hour webinar designed to deepen your understanding of effective manipulative use in Key Stage 2 and 3 classrooms.

Session Overview

In this webinar, we'll dive into the latest evidence on how manipulatives can support learning as a scaffold, share practical strategies for integrating them into lessons, and explore when and how to transition students toward greater independence. Packed with actionable examples and insights, this session will support you in both developing your understanding and strengthening your classroom practice.

Facilitators

Jamie Heathcote is a highly experienced primary maths consultant, NPQLPM facilitator and an Evidence Lead in Education (ELE) with Exchange Research School.

Drew Sherratt is a Deputy Headteacher in a Doncaster secondary school where she previously held the role of Curriculum Leader of Mathematics. She works with Exchange Research School as an ELE.
