# Improving Secondary Science

A two-day training programme to explore the most effective ways to improve teaching and results

Research has shown that disadvantaged students start to fall behind in science as early as Key Stage 1 and the gap only widens throughout primary and secondary phases. The EEF Guidance Report has reviewed the best available international research and has consulted with experts to identify key principles for effective secondary science teaching. It will focus on the strategies which are most likely to have a positive impact for students.

This programme will enable delegates to:

- Understand the evidence base on effective science teaching
- Explore effective strategies for science teaching, including self-regulation, memory, modelling, practical work, the language of science and feedback
- Consider ideas and resources for use in the classroom and give you the opportunity to reflect on your own practice and identify areas for development

Led by Sandringham Research School Team

## **Aimed at**

Science teachers, heads of science and heads of science key stages in secondary schools

## **Dates**

Tuesday 24<sup>th</sup> January, 9.30 am – 3.00pm  
Friday 10<sup>th</sup> March, 9.30am – 3.00pm

## **Venue**

Sandringham School, The Ridgeway,  
St Albans. AL4 9NX

## **Cost**

£195 per person  
including all refreshments, resources and a free copy of the Guidance Report
